INVITATION

Dear Scholars and Experts in Crisisonomy!

It is now the season to celebrate the beautiful summer sight of Jeju Island, Korea. We would first like to express our appreciation for all your warm interest and affection for the academic advancement of crisisonomy, which means crisis & emergency management science.

In 2019, it was decided to establish the Asian Association for Crisisonomy in Jeju Island as an effort by lots of scholars and experts in Asian countries to ensure the safety of mankind and communities. Unfortunately, however, due to the COVID-19 Pandemic, at the Asian Conference on Crisisonomy (ACC) for two years in 2020 and 2021, we could not meet in person and had to hold the ACC through non-face-to-face online video. After 3 years, in this 2022, we are very happy to meet again with the theme of post-pandemic climate crisis and disaster resilience.

2022 ACC will be held at Jeju National University, Korea, from 20 to 23 July in cooperation with research organizations from Korea, Japan, China, USA, Nepal, Thailand, Mongolia, New Zealand, Pakistan, and Bangladesh.

With the theme of “Climate Crisis and Disaster Resilience Approach: Disaster Management Resources and Recovery,” 2022 ACC will be a valuable chance to share rich academic discussions and opinions on various topics such as climate crisis, disaster resilience, disaster management resources, public safety, new crises, and so on.

It is a great honor to invite distinguished scholars and experts in the fields of crisisonomy, disastronomy, and safety management to this ACC, and we ask for your interest and participation in the 2022 ACC.

Once again, we sincerely thank all the scholars and experts who are working on the academic development of crisisonomy and disastronomy.
